About Me

I am a fresh graduate Informatics Engineering student at Universitas Riau with a GPA of 3.72, passionate about databases and experienced in developing projects using Kotlin and Python. My active involvement in various organizations has sharpened my leadership, problem-solving, and teamwork skills. I am eager to further my expertise in informatics, contribute to innovative projects, and grow both professionally and personally in the dynamic field of technology.

Education

- SMAN 3 Karimun | Mathematics and Natural Sciences (MNS) 2019 - 2022
- University of Riau | Informatics Engineering 2022 - 2026
- Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka | 2024
Mobile Development Cohort

Experience

2023 | Treasurer at Plenary Session

Managing the available funds and learning to collaborate with other departments to ensure all needs are fulfilled without experiencing a budget shortfall.

2024 - 2025 | Intern at DISKOMINFOTIK Riau

Contributed to the development of the SIPENA web application. Performed quality assurance and quality control (QA/QC) testing for the Bidikmisi Riau App. Assisted with data entry and data validation to ensure accuracy, consistency, and reliability of organizational data.

Project

Course Scheduling Optimization (Faculty of Engineering, Universitas Riau)

Developed and optimized a course scheduling application for the Faculty of Engineering, Universitas Riau using a Genetic Algorithm to automate timetable generation and minimize scheduling conflicts. The project involved processing and updating the latest scheduling data, including courses, lecturers, classrooms, and time slots, while enhancing the database to support new scheduling requirements. Additionally, implemented features such as Team Teaching, Soft Constraint evaluation, and Room Utilization Rate (RUR) optimization using Python to improve schedule quality, classroom utilization, and overall scheduling efficiency.

Redesign University of Riau Website

Redesigned the University of Riau website, starting with wireframes and mockups using Adobe Illustrator. Then, implemented the redesign using CSS, JavaScript, and Bootstrap.

Cashier App

Developing a Java-based application with MySQL, capable of handling transactions and storing existing stock data, as well as tracking the inflow and outflow of goods in a store.

Android Studio Project

developed various applications, including a frontend for a cancer detection app, an event listing app, incorporating key Android components like RecyclerView, CardView, ListView, Fragment, Toolbar, and Room for local data storage. Additionally, I integrated APIs for dynamic data handling, enhancing app interactivity and functionality.

Website SIPENA for DISKOMINFOTIK Riau

Developed the SIPENA web application, including master data management (Create, Read, Update, Delete), and implemented the business workflow for processing application requests submitted by regional government agencies to Diskominfo Riau.

Glowyguide.com

Partnered with my classmate to create a WordPress-based website and an e-commerce website focused on beauty products. We customized themes and used plugins to design the UI, optimizing the usability of the website. This website achieved high quality and reached a good ranking visibility on search engines.

Skill

Soft Skill

Time Management, Leadership, Teamwork, Problem Solver, Adaptive, Communicative

Hard Skill

Microsoft Office, Python, CSS, Javascript, SQL, Figma, Canva, Android Studio, Java, Kotlin
